TABLE OF CONTENTS

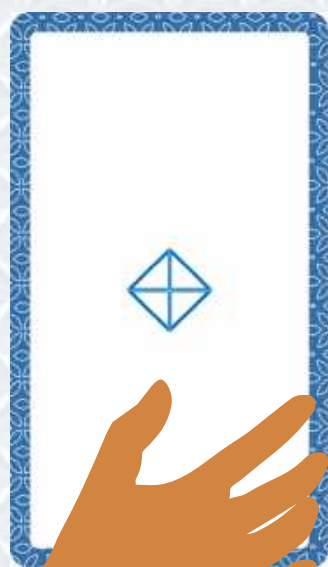

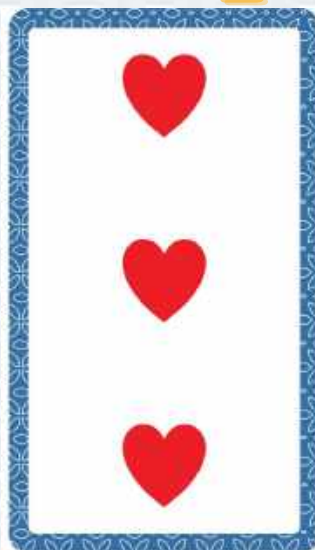

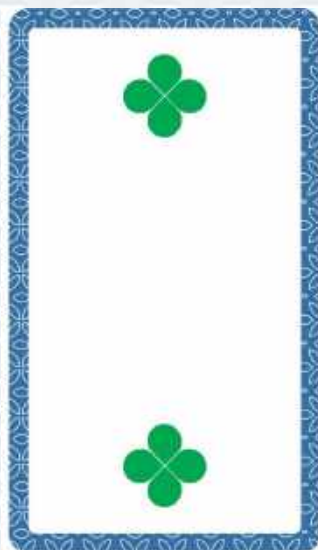

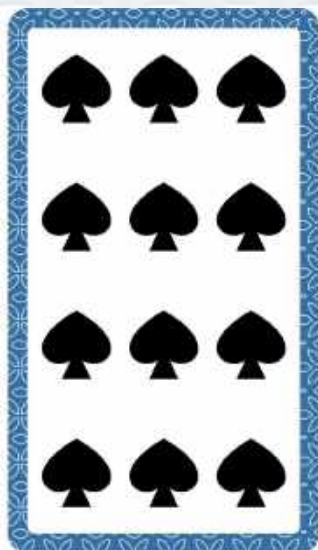

1	MATHIC NUMBER RULEBOOK
2	WHOLE NUMBER/BASIC CARD QUESTIONS
3	GREATER / LESS THAN CARD QUESTIONS
4	GREATER / LESS THAN OR EQUAL TO CARD QUESTIONS
5	MULTIPLE OF (DIVISIBLE BY) CARD QUESTIONS
6	ROUNDING CARD QUESTIONS
7	MIXED CARD QUESTIONS

Whole Number Cards

There are 52 whole number cards from 0 - 12 in four suits (clubs, diamonds, hearts, and spades.) These cards can only be the number they represent.

How Many Equations Can You Compute?

How many equations can you make with any of the cards above and the card in your hand. If you make an equation with all of 5 cards, you get 10 points for making a "solution".

Number Cards

There are 8 number cards that can be any number that it says on the card.

This card can be any odd number.

This card can be any even number.

This card can be any square number.

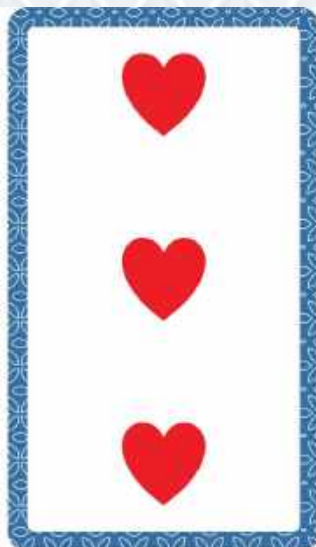

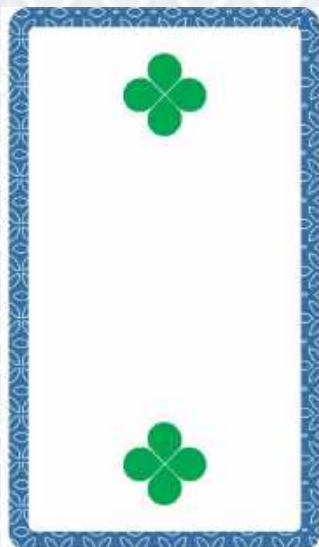

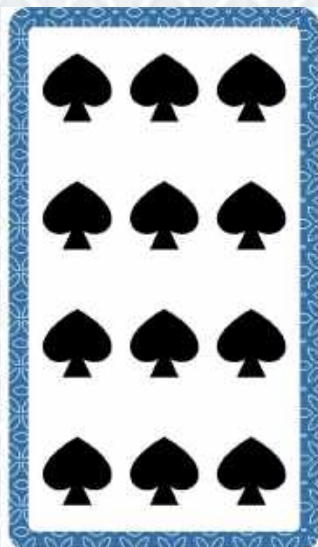

This card can be any prime number.

This card can be any composite number.

How Many Equations Can You Compute?

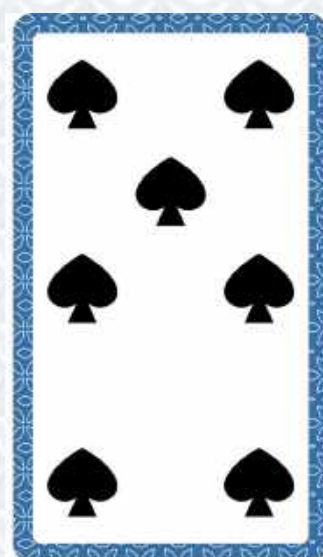

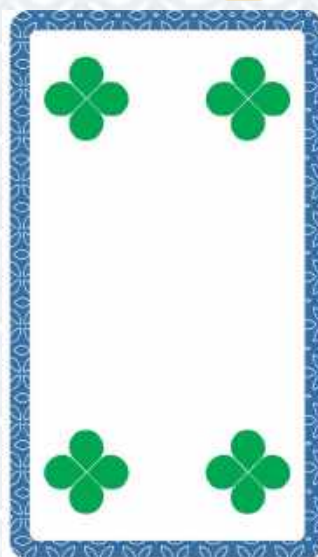

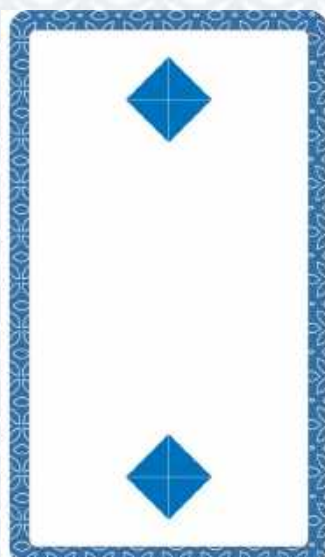

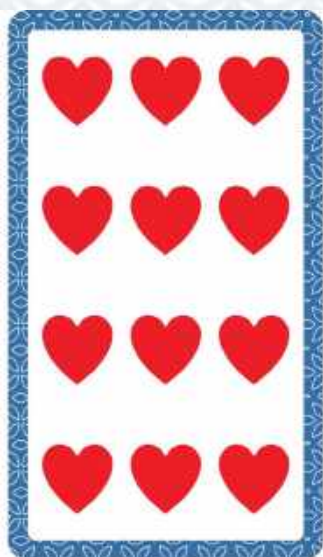

How many equations can you make with any of the cards above and the card in your hand. If you make an equation with all of 5 cards, you get 10 points for making a "solution".

<i>Equations</i>	<i># of Cards</i>	<i>Points (Solutions)</i>
